## Restoration and Legacy Liability Management

Concerns about global climate disruption and environmental performance are placing corporate restoration and legacy liability management under increasing scrutiny. Insufficient governance and management systems approaches introduce a broad spectrum of risks, from financial and brand risk to capital market risks and revenue risks. In summary, restoration and legacy liability performance are a critical aspect of a corporation's comprehensive sustainability strategy.

In the age of the environmentally-aware consumer and investor:

- ❖ Are you confident that your organization's restoration and legacy liability performance is adequate?
- ❖ Are your environmental management systems keeping pace with your branding activities?

### Improving Restoration & Legacy Liability Performance

To minimize corporate risk EHS functions must improve restoration and legacy liability effectiveness in several critical capabilities:

- ❖ Portfolio Management, project stratification and prioritization;
- ❖ Resource and organizational design optimization;
- ❖ Project Management and Site Resolution process improvement and metrics;
- ❖ Stakeholder engagement;
- ❖ Valuation and risk management.

### Restoration and Legacy Liability Management: Cost Center, Risk Mitigation Service, or Source of Value?

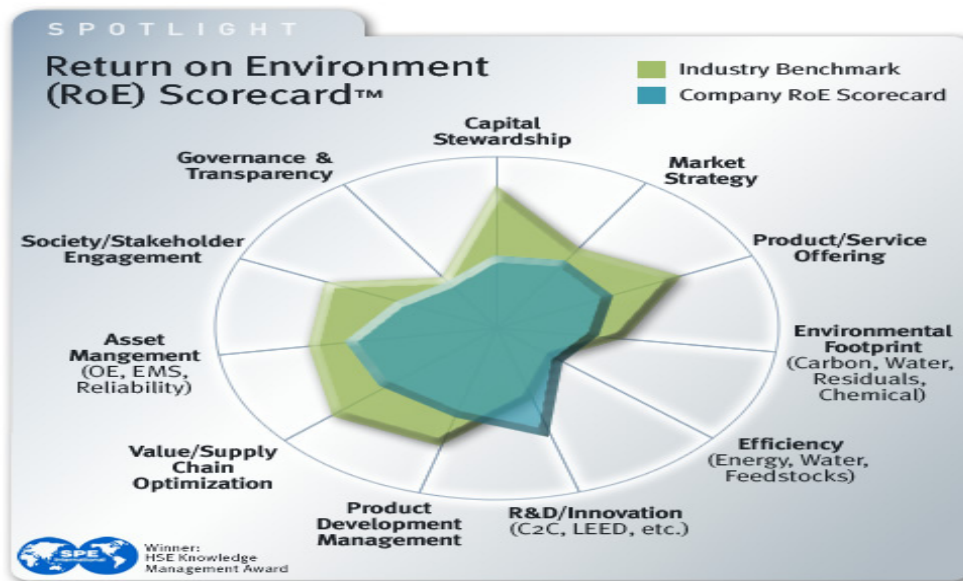

Many executives perceive EHS functions in general, and restoration and legacy liability management specifically, as a risk mitigation service at best and a cost center at worst. Only the most enlightened leaders believe that top restoration and legacy liability performance is a source of competitive advantage and shareholder value. MetaVu has helped clients in many industries seize these opportunities.

### How can MetaVu's Restoration and Legacy Liability Management Practice Help?

MetaVu's experience in industries with heavy environmental footprints (including Chemicals, Manufacturing, Mining, Oil and Gas, Transportation, and Utilities) help the company deliver exceptional value to its clients through the Restoration and Legacy Liability Management Practice.
